SEE THE STOVE IN YOUR HOME BEFORE YOU BUY IT!

At VARDE, we know that the right wood-burning stove requires the best location in your home - and it has never been easier. Take a picture of the place where you would like to install the stove. Lean back comfortably on the couch and choose a stove from our extensive range of models. When you have found exactly the right place for your new stove, save the picture and share it with family and friends.

- Can be used for smartphone and tablet
- Extensive range of models
- Technical data on wood-burning stoves
- Share with family and friends
- Survey of distributors

STOVE FAN HEAT POWERED 60-300 ° C

STOVE FAN POWERED BY HEAT

The heat powered stove fan is designed to circulate the warm air created by a stove. The fan gently and silently moves air from the hot zone around the stove to distribute the heat around the room. It works completely silent, and saves up to 15% of firewood.

- Article No.: 100497
- EAN-Nr.: 5703505047703
- Silent operation
- For gentle circulating warm air in the room
- Ensures energy-efficient distribution of hot air thereby saving fuel for the stove
- Operating range 60-300 ° C
- Attractive Design, durable
- Black with anodized wing

IMPROVED EFFICIENCY

The warm air is circulated evenly throughout the room, and increases living comfort. The hot air flows into the complete living area, and not at the ceiling. The optimal circulation ensures greater comfort and less fuel consumption.

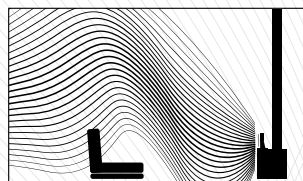

CONCEPT

The sleek anodized aluminum blades circulates the air gently from the hot zone around the stove, evenly throughout the room..

PLACEMENT

Place the fan on the front of the stove. Please place not directly beside the flue pipe, as otherwise may lead to irregularities.

With stove fan

Without stove fan
